## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for determining third party usage charges by receiving a customer account record comprising usage data, it does not reasonably provide enablement for determining said charges without first receiving the customer account data. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. See, Specification at page 13 where it reads "Usage information computed by the pager service provider 152 is inserted 190 into each customer record. The customer records prepared by the pager service provider 152 are then transmitted 192 to the billing system 125 of the telephony network "

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The applicant points to page 13 to support the term standard file layout. The specification reads "[A] standard file layout containing the information needed to determine how many pages a particular customer received is typically transmitted between the pager service provider 152 and CBS module 148 on a cyclical basis." There is no teaching of a standard file layout comprising third party usage charge information. That information seems to be part of a customer record prepared and transmitted by the second service provider. Clarification is requested.

There is no outstanding art rejection. Thus the applicant is encouraged to contact the examiner to advance prosecution of this case.
